5

ACHIEVING BOARD EFFECTIVENESS

The delivery of in-house governance education is structured to provide suitable training while maintaining the integrity of the learning experience.

The learning approach consists of a series of facilitated discussions and interactive case studies that can augment understanding.

AICD selects expert facilitators based on their directorship experience in a sector or industry, as well as their ability to engage and connect with participants.

It is essential that all participants commit to the necessary pre-reading to get the most out of the group learning experience. We also recommended that participants complete the optional individual assessment to consolidate their knowledge.
